

PRODUCT INFORMATION SHEET

GYS 2600 DENT REPAIR

The GYSPOT 2600, with its 2600 A maximum output current is the ideal product for dent pulling and straightening of car body panels (bonnet, door, roof panel, guards, quarter Panels). The GYS 2600 is multifunctional, which makes it a complete solution. Thanks to its low power consumption, it can work on a simple 240V single phase power supply.

- adjustment, the potentiometer enables selecting both the output power and the requested mode.
- Automatic, the weld is created by simply making a contact between the tool and the element to straighten.

- x **1 spot inertia hammer (1,1kg)**
- x **1 star holder tip**
- x **3 stars**
- x **1 contact shrinking tip**
- x **1 earth tag**
- x **1 strap**
